As many of you know, IOA is a brand new charitable organization. Our hope is to award \$100,000 in research grants *this year alone*. Bone research has been an area of the medical field that has been greatly neglected worldwide. IOA has partnered with the U.S. Bone Decade to help form the Rare Bone Disease Network. While our research emphasis is on autosomal dominant osteopetrosis (ADO), we will be sharing our research with other organizations in the bone field. **All money raised by this event will go *directly* to fund these grants!**

With warmest regards,

Ashley Gettinger, Executive Director
